

**INCREASING THE STABILITY OF COSMETIC FORMULATIONS
BY ADDITION OF IMINODISUCCINIC ACID**

Abstract of the Disclosure

The present invention is a method for increasing at least one of the color-stability and the light-stability of a cosmetic or dermatological formulation, comprising the step of adding iminodisuccinic acid or a salt thereof to the cosmetic or dermatological formulation. The invention also includes a cosmetic or dermatological formulation comprising iminodisuccinic acid or a salt thereof and a cosmetic or dermatological product comprising the cosmetic or dermatological formulation and transparent or translucent packaging.
